

Your whole cleaning business, running in one place. Live now at
your own address.

Everything your website promises, working today

Every promise on kleahome.co.uk is working software here. A client books online in two minutes. The closest vetted Kleaner is matched by postcode patch, the reminder goes out by itself, your cleaner works from your own Klea Standard checklist with photo evidence, the client can move or cancel under your cancellation policy, wages accrue automatically, and every pound lands in a live profit and loss. Your Guesty changeovers flow in on their own. No spreadsheets, no WhatsApp rota, no chasing.

Booking arrives → Kleaner auto-matched → reminder sent → clean worked on phone →
photos + rating → wages accrue → P&L updates

See it live

It is on your own web address now. Open it on your phone while you read this.

URL: portal.kleahome.co.uk

Office login: hello@kleahome.co.uk / [KleaAdmin2026!](#)

A Kleaner login, to see their side: sophie@kleahome.co.uk / [Kleaner2026!](#)

Sign in as the Kleaner to see exactly what your team sees: their own jobs and rota, and no pricing anywhere.

Your marketing site at kleahome.co.uk is completely untouched. The portal simply sits alongside it on its own address.

THE TOUR

Ten parts of your platform

1

Clients book in two minutes

portal.kleahome.co.uk

Your services, your prices, your FAQs. Postcode check covers the Fylde Coast, so out-of-area enquiries are handled politely rather than wasting your time.

Add-ons are the ones you actually sell: oven clean, bed changes with a count, fridge and freezer. First visit is charged at the reset-clean rate, with your regular rate from visit two. Kleaners appear with photo, profile line and DBS badge, closest patch first.

2

Bookings arrive as requests, if you want

Bookings

A switch on the Bookings page decides whether website bookings confirm instantly or land as requests for you to approve. Nothing reaches a rota without your say—so when it is set to requests.

You can also add a booking yourself, with a custom amount that overrides the calculated price.

3

The rota, with time off built in

Rota

Everyone's week at a glance, or click a name to see just that Kleaner. Book holidays, sickness or any blocked-out day and it greys out on the rota.

Time off genuinely blocks work: nobody on leave is offered a new job from any source. If you book someone off over jobs they already have, you get told which ones need reassigning.

4

Your Guesty changeovers, automatically

Guesty

Connected to your account and syncing on its own every three hours. Every checkout becomes a changeover clean at 10:00, sized to finish by 15:00 before the next guest.

All of them land as requests for you to approve. Same-day turnarounds are flagged in red. If a guest cancels in Guesty, the clean cancels here, so nobody drives to an occupied property.

5

Your Kleaner's whole shift, on their phone

Kleaner app

Every Kleaner has their own login. One-tap call to the client, key and access notes, the full Klea Standard checklist, photo upload, Start and Finish.

They see their own jobs and rota, nothing else, and **never what you charge**. They can set their own working hours, log extra time and upload their DBS and documents themselves.

6

The Klea Standard, on every job

The checklist from your website is built into every clean: bedroom, bathroom, living room and kitchen, plus the deep clean extras. A domestic clean ticks the standard items, a deep clean ticks everything.

This is "**every clean is photographed and rated**" made operational. The standard never depends on memory.

7

Clients help themselves

My cleans

Clients move or cancel their own cleans, see the photos of every finished clean and leave the star rating.

Your policy is enforced by the software: free until midday the day before, 50% after. No awkward phone calls.

8

Staff files that watch themselves

Staff

A full employment file per Kleaner: right to work, DBS certificate and recheck date, training, contract, emergency contact, plus your company insurance and registrations.

Anything within 60 days of renewal turns amber and appears on your dashboard, so nothing lapses quietly.

9

Payroll and hiring

Payroll

Wages accrue from completed cleans, with a separate weekend rate where you set one. Click any Kleaner for a week-by-week breakdown of every job and the rate applied.

Your **Become a Kleaner** page feeds a hiring pipeline. One click turns an applicant into a staff file with every onboarding check flagged until done.

10

Your money, honestly

Reports

Stock levels for the Klea kit with reorder alerts, an expense ledger, and a monthly profit and loss built from real revenue, real wages and real spend.

Every action is recorded too, so you can always see who did what and when.

HOW IT JOINS UP

Your website keeps doing its job

Nothing about kleahome.co.uk changes. Your site keeps its pages, its blog and its search rankings, and the portal sits alongside it on its own address. The only edit is where your booking buttons point.

Customer reads kleahome.co.uk → taps **Get my price** → lands straight in your booking form → booking appears in your ops room

Every "Get my price" and "Book a clean" button points at one address:

portal.kleahome.co.uk/#/book . That opens the booking form itself, not another home page, so there is no extra click and no dead end.

The handover is invisible. The booking pages use the same typefaces, colours and wording as your site, so a customer simply feels they carried on booking.

Why not replace the website entirely? Because your site earns you customers. The blog, Declutter, Gift a clean and your FAQ pages all bring in traffic that a booking system would not. Keeping them also means that if the portal ever needs attention, your shopfront is unaffected. Two jobs, two tools, one brand.

Your FAQs, in two places

Your FAQ answers are already built into the booking pages, so customers get them at the moment they are deciding, without leaving the form. They also drive how the software behaves:

YOUR PROMISE	WHAT THE SOFTWARE DOES
Same cleaner every visit	Repeat bookings hold the same Kleaner, with cover offered only when they are away
Change or cancel free until midday the day before	Enforced automatically, free before the deadline and 50% after
First clean is a reset clean	Visit one charges the one-off rate, your regular rate applies from visit two
Every clean photographed and rated	Photo upload built into every job, clients rate from their own login
Not happy? We re-clean free	One button books a free re-clean and messages the client
Add-ons done on the same visit	Priced flat and added to the visit time, never eating into cleaning hours
Team Clean, two cleaners, same hours	Tick box, £10 supplement, halves the time on site
We cover the Fylde Coast	Postcode checked before booking, out-of-area declined politely

Worth deciding at some point: your website and the portal each hold a copy of the FAQ wording. Picking one as the master keeps them from drifting apart as you change things.

Built already, and what we connect at launch

The platform is complete and running. Going live is a connection exercise, not a build.

AREA	STATUS	AT LAUNCH
Booking, pricing, scheduling	Built	Ready as it stands
Rota, time off, per-Kleaner views	Built	Ready as it stands
Checklists, photos, ratings	Built	Ready as it stands
Guesty changeovers	Connected	Already syncing every 3 hours
Logins and access levels	Built	Fresh passwords on day one
Payroll, stock, costs, P&L	Built	Ready as it stands
Card payments	To connect	Your Stripe account, money straight to you
Texts and emails	To connect	Real sending from your IONOS address
Your team and clients	To load	Replace the demo people with your own

The system is loaded with a demonstration business so every screen shows real working data. One button clears it all when you are ready to trade for real.

FAQs

- **Can we change prices, services and add-ons?** Yes. The whole catalogue, services, add-ons, discounts, checklists and FAQs, is yours to change whenever you like.
- **Does it cover our area?** Yes, it is set to the Fylde Coast and surrounding area. Out-of-area postcodes are declined politely at the booking stage.
- **Will our Kleaners see what we charge?** No. Pricing is stripped out of everything a Kleaner can reach, not just hidden on screen.
- **What happens if a guest cancels in Guesty?** The changeover cancels here automatically, so nobody travels to an occupied property.
- **What does it cost to run?** Hosting is around £5 to £10 a month, plus normal card fees and pennies per text. No per-seat software fees, no lock-in.
- **How quickly could we go fully live?** Around a week once payments and messaging are connected, and your own team and clients are loaded.
- **Is our data ours?** Yes. It runs on its own database, shared with nothing and nobody else, and exportable at any time.
