

Your whole cleaning business, running in one place. And it is already live.

Everything your website promises, working today

Every promise on kleahome.co.uk is working software here. A client books and pays online in two minutes. The closest vetted Kleaner is matched by postcode patch, the reminder goes out by itself, your cleaner works from a phone checklist with photo evidence, the client can move or cancel under your own cancellation policy, wages accrue automatically, and every pound lands in a live profit and loss. No spreadsheets, no WhatsApp rota, no chasing.

Client books → Kleaner auto-matched → reminder sent → clean worked on phone → photos + rating → wages accrue → P&L updates

See it live

It is on the internet now. Open it on your phone while you read this.

URL: klea-demo-production.up.railway.app

Your office login: hello@kleahome.co.uk / [KleaAdmin2026!](#)

A Kleaner login, to see their side: sophie@kleahome.co.uk / [Kleaner2026!](#)

Sign in as the Kleaner to see what your team sees: their own jobs and rota, and no pricing anywhere.

It comes loaded with a realistic demo business: six Kleaners, nine clients and three months of trading history, so you can see every screen doing real work.

This was built around your business: your services, your prices, your FAQs and your cancellation policy, taken straight from kleahome.co.uk.

THE TOUR

Eight parts of your platform

1

Your clients book in two minutes

klea-demo-production.up.railway.app/#/

Try booking a weekly clean for a 3-bed, add an oven clean and a Team Clean, and pay with any card number.

Notice: your FAQs on the page, the postcode coverage check, flat-priced add-ons, the **reset clean first visit** with your weekly rate from visit two, and Kleaners shown with photo, profile line and DBS badge, closest patch first.

2

Your ops room sees it instantly

klea-demo-production.up.railway.app/#/admin

Every booking lands on the dashboard and the weekly rota the moment it is made, already assigned to the right Kleaner.

Notice: jobs cluster by **postcode patch** so travel stays tight, and any empty rota slot books a job with one click. The dashboard also flags low stock and compliance renewals by itself.

3

Your Kleaner's whole shift, on their phone

klea-demo-production.up.railway.app/#/cleaner

Every Kleaner gets their own login. Sign in as Sophie and open a job: one-tap call to the client, key and access notes, the full Klea Standard checklist, photo upload, Start and Finish.

They see their own jobs and their own rota, nothing else, and **never what you charge**. The checklist is the one from your website, so a domestic clean ticks the standard items and a deep clean ticks the extras too.

4

Your clients help themselves

klea-demo-production.up.railway.app/#/my

Sign in as **hannah.price@example.com**. Clients move or cancel their own cleans, see the photos of every finished clean, and leave the star rating.

Your policy is enforced by the software itself: free changes until midday the day before, a 50% fee after, exactly as your FAQ promises. No awkward phone calls.

5

Compliance that watches itself

klea-demo-production.up.railway.app/#/admin/staff

A full legal file for every Kleaner: right to work, DBS certificate and recheck date, training, contract, emergency contact. Company insurance and registrations alongside.

Anything within 60 days of renewal turns amber and appears on the dashboard, so nothing lapses quietly.

6

Payroll that pays itself out

klea-demo-production.up.railway.app/#/admin/payroll

Wages accrue from completed cleans at each Kleaner's hourly rate. One click pays out what is due, with full history.

Your **"paid weekly, every week"** promise to Kleaners, kept automatically.

7

Your money, in one honest view

klea-demo-production.up.railway.app/#/admin/costs

Stock levels for the Klea kit with reorder alerts, and an expense ledger where buying supplies books the cost automatically. Then open [#/admin/reports](#) : a monthly profit and loss built from real revenue, real wages and real spend.

The whole business, from a client tapping "Book a clean" to your net margin, in one place.

8

Hiring, built in

klea-demo-production.up.railway.app/#/join

A Become a Kleaner page carrying your own recruitment promises: choose your hours, we find your customers, paid weekly, first year's insurance covered. Applications take two minutes, no CV needed.

Every application lands in your hiring pipeline on the Staff page. One click on **Hire** creates their cleaner file, with right to work, DBS, contract and training all flagged until onboarding is complete. Recruit to rota without a single spreadsheet.

Built already, and what we connect at launch

The platform is complete. Going live is a connection exercise, not a build.

AREA	STATUS	AT LAUNCH
Booking, pricing, scheduling	Built	Ready as it stands
Checklists, photos, ratings	Built	Ready as it stands
Payroll, stock, costs, P&L	Built	Ready as it stands
Card payments	To connect	Your Stripe account, money straight to you
Texts and emails	To connect	Real sending in your name
Logins	To connect	Secure accounts for team, Kleaners and clients
Your domain	To connect	Runs at a kleahome.co.uk address, one DNS record

Kleaner photos in the demo are placeholders. At launch we load your real team, your coverage postcodes and your photography.

FAQs

- **Can we change prices, services and add-ons?** Yes. The whole catalogue, services, upsells, discounts, checklists and FAQs, is yours to change whenever you like.
- **Does it cover our area?** The coverage check is one setting. We switch it to your Fylde Coast postcodes in a minute.
- **What does it cost to run?** Hosting is around £5 to £10 a month, plus normal card fees and pennies per text. No per-seat software fees, no lock-in.
- **How quickly could we launch?** About a week once payments and messaging are connected: we plug in Stripe, text and email sending, secure logins and your domain, then load your real team and prices.
- **Is our data ours?** Yes. It runs on its own standalone database, shared with nothing and nobody else, and exportable at any time.
